

Chapter 2 - Design Portfolio Logo

Create a document 8 inches by 8 inches. Complete the following:

1. Insert a minimum of **six different shapes** to your illustration. These shapes should fill the entire background of your illustration.

Change these 6 shapes to include the following at least once:

- ❖ Fill color that you customized to be your own
- ❖ Gradient that customized to be your own
- ❖ No stroke
- ❖ A thick colored stroke
- ❖ A gradient stroke
- ❖ Rotating a copy
- ❖ Scaling a copy
- ❖ Use the Direct Selection Tool to change at least two of the shapes.
- ❖ Layer these shapes to create something unique and interesting for the background.

2. Add your first name plus "Design Portfolio" to project. For example "Megan's Design Portfolio."

These words should be large and take up most of the illustration. Each of these words should be in a separate text box with different font styles, size, colors, etc.

On at least one of the words, include the following skills:

- ❖ Type on Path (Remember: Once you use Type on Path, the shape disappears and is not a place holder for the text.)
- ❖ Gradient you created (Type=>Create Outlines. Remember: you can't change the font style once you have created outlines.)
- ❖ Stroke color and weight
- ❖ Drop shadow

WHEN YOU ARE COMPLETED, ADD THIS LOGO TO THE HOMEPAGE OF YOUR ONLINE DESIGN PORTFOLIO FOR A GRADE.
