

LHS

Algebra II Review Packet - 2018

IMPORTANT INSTRUCTIONS FOR STUDENTS

I understand that students come to Algebra II with different strengths and weaknesses. For this reason, please read over the following instructions carefully to help you complete the packet with the most success possible!

- Students should try to answer all the questions; you must **show all work**.
- Students must answer all questions to receive **full credit**.
- If after reading the example, you are still unable to complete a problem, there are options to assist you.
 - **Khan Academy** – search Khan Academy for the **topic heading** (for example: **Distributive Property** or **Rules of Exponents**) of the section on which you are working. Most of the time, if you Google search the topic, the Khan Academy video will appear in the results.
 - Ask for help during class!! **We**, as a whole, will help each other. Use your **classmates** FIRST before asking me.
- Please remember **integrity** is a core value at LHS. You are only hurting yourself by attempting to copy someone else's work. This packet is to help **YOU** be ready for Algebra 2, and to help me better understand what you can do.
