
Background Music on a Website

1. Find music you would like to use on YouTube.
2. Copy the URL.
3. Go to <http://www.vidtomp3.com/>
4. Paste the URL and the site will convert the video to an MP3.
5. Save the MP3 file to the folder where your webpage is. Change the name to one word and something easy to remember!
6. Insert the following code as an HTML snippet in Contribute. Make sure you update the name of the MP3 file in the code.

```
<embed src="NameOfFile.mp3" autoplay="true" hidden="true"  
loop="true"></embed>
```
